User Manual (Instalation and build instructions)

 The Apartment Rater is a java web app is licensed under the MIT license Please see the file LICENSE

https://github.com/01akanksha/AppartmentRater/blob/master/LICENSE   for license term

Build Instructions:

1. Make sure you have JDK 8 and NetBeans 8.1 installed in your machine

>   you can have it from -http://www.oracle.com/technetwork/java/javase/downloads/index.html

 2. Install the Ucan Access Drivers version -3.0.6 into the Project library as well as in the jdk folder.

>   It is an open source bridge for the java 8 as java 8 doesnot have jdbc bridge any more.

>   you can install from -http://ucanaccess.sourceforge.net/site.html

>   Put the libraries from library folder of the ucan access in the below location-

>   C:\Program Files\Java\jdk1.8.0_73\jre\lib\ext

>   Also from net beans add the libraries by going to Project Properties and then to the libraries tab
>   and then adding these libraries
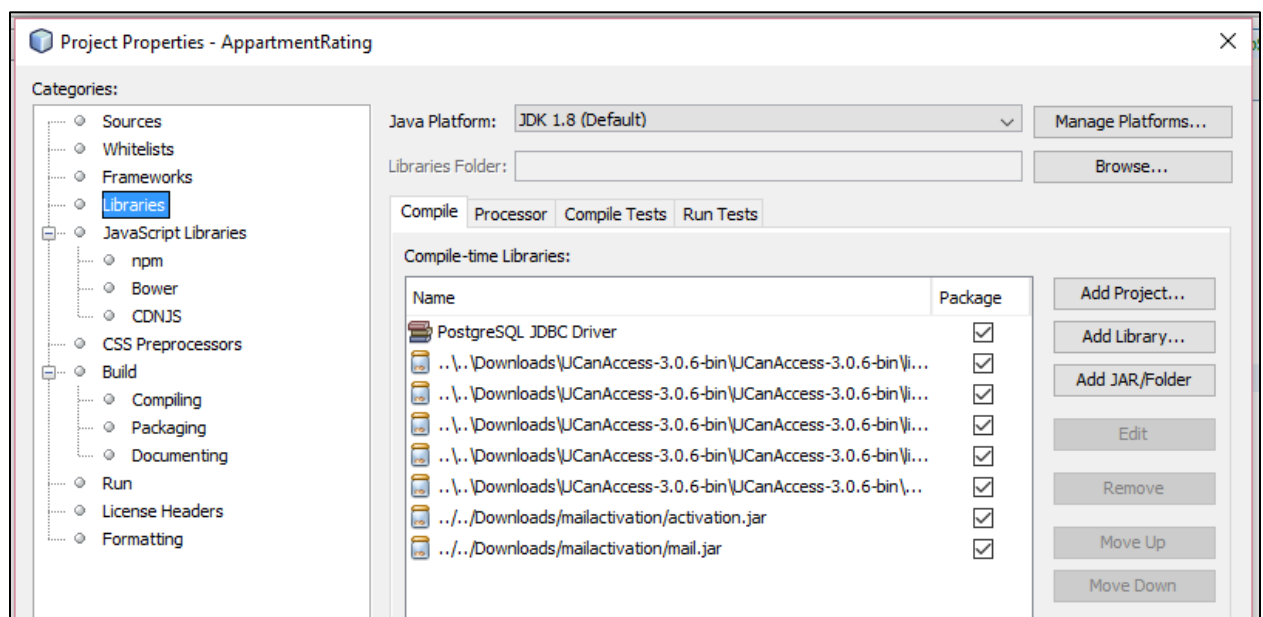

3. Download as zip or clone the code for ApartmentRater from

 https://github.com/01akanksha/AppartmentRater and launch(open) it in the netBeans

4.Please make sure you are having GlassFish version 4.1.1 server installed on your machine and don't
forget to set the projects running server as GlassFish.

It is also available under the open source.

you can download from-https://glassfish.java.net/download.html
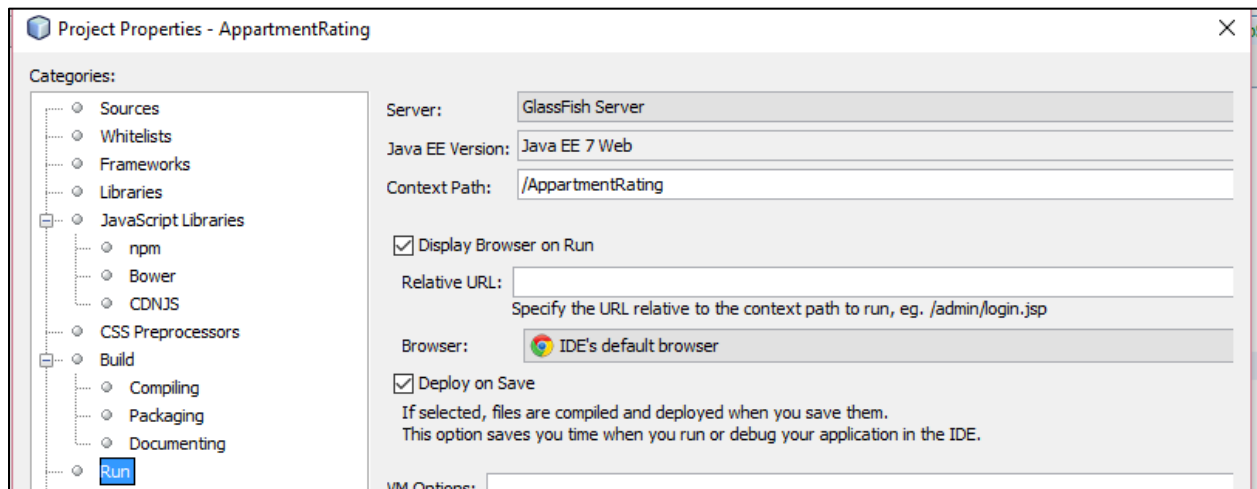

5) After all the above things are set you can run the application from the net beans by clicking the run button. After the successful deploy it will open it in the web browser.
